PROFESSIONAL SUMMARY

Data Analyst with nearly three years of experience applying data analytics, business intelligence and AI to large, multi-source datasets. Experienced in developing Power BI dashboards, data models and analytical workflows, integrating datasets and translating stakeholder requirements into actionable insights. Hands-on experience with AI-driven personalisation, predictive modelling and responsible AI governance, alongside strong data quality and GDPR practices. Holds an MSc in Data Analytics and a Bachelor of Accounting, with experience collaborating across technical and business teams.

WORK EXPERIENCE

Data Analyst | **Vietnam Public Joint Stock Commercial Bank (PVcomBank)**
Aug 2023 – Dec 2024

- Integrated and analysed large datasets across multiple banking systems using SQL extraction, transformation, validation and reconciliation to support reliable reporting and decision-making. • Built data quality and validation frameworks to identify inconsistencies, investigate discrepancies and improve the reliability and consistency of master data.
- Developed and optimised complex Oracle SQL queries and stored procedures for data transformation, analysis and reporting.
- Designed Python and AWS Glue pipelines to integrate and model structured and semi-structured data from multiple sources.
- Gathered and documented stakeholder requirements, translating analytical needs into technical specifications and data models.
- Worked with sensitive customer and transaction data in a regulated environment, applying dataprotection, governance and quality controls.

Data Analyst | **Dagoras Technology and Communication JSC**
Aug 2022 – Jul 2023

- Collected, cleaned and modelled data from multiple sources to produce consistent and accurate analytical datasets.
- Developed Power BI and DAX reporting solutions used by 50+ stakeholders, supporting clear and reliable information for decision-making.
- Supported ETL processes and scheduled data refreshes, investigating data-quality issues and resolving discrepancies.
- Documented requirements, technical specifications and data models within Agile projects and worked with stakeholders to clarify data needs.

Data Analyst Intern | **Synodus JSC**
Mar 2022 – Jul 2022

- Supported SQL-based ETL processes for extracting, transforming and reconciling data across relational databases.
- Performed data validation and root-cause analysis to identify inconsistencies and improve data accuracy.
- Worked with relational data models and query optimisation to support structured analytical datasets.

PROJECTS

Customer Insight Dashboard | **Power BI, DAX, RFM Analysis - Dashboard**
2023 | Household Appliance Service Provider (Client Project)

- Led the Data Analyst function building a Power BI customer-insight dashboard for a household appliance company's customer service app, including RFM-based segmentation (K-means, 7 groups).
- Directed the underlying analysis pipeline and satisfaction/retention analytics (NPS, retention rate, DAU/MAU), supporting customer outreach strategy and service quality.

Customer Personalisation in Digital Banking | **Python, TensorFlow, XGBoost, SHAP - Colab**
Jan 2026 | Dublin Business School (MSc Research Project)

- Designed and evaluated an adaptive personalisation framework for digital banking (behavioural embeddings, XGBoost ranking, LinUCB bandits) and produced an independent research report on GDPRaligned AI governance, following the ASUM-DM methodology.
- Improved minority-class recall from 4% to 78% (AUC 0.75) through SMOTE resampling and hyperparameter tuning, applying SHAP for model explainability.

Wine Quality Prediction Using CRISP-DM | Python, RapidMiner, XGBoost, SMOTE - Colab
May – Sep 2025 | Dublin Business School

- Applied the CRISP-DM framework to analyse 1,599 wine samples, identifying key factors associated with wine quality and preparing the data for predictive analysis.
- Compared multiple predictive models and achieved up to 86% ROC-AUC, then developed a deployment strategy for quality-control decision making and ongoing model monitoring

EDUCATION

MSc Data Analytics | **Dublin Business School**
2026

- Upper Second Class Honours (65.17%) | Under the Government of Ireland International Education Scholarship
- Selected results: Statistics for Data Analytics 100%; Data Storage Solutions 86%; Machine Learning 78%.

Bachelor of Accounting – Major: Auditing | **Academy of Finance, Vietnam**
2022

- GPA: 3.22/4.0 | Advanced programme oriented to ICAEW CFAB, covering financial reporting, auditing and internal controls.

KEY SKILLS

- Data & BI: Power BI, DAX, SQL, Python, Excel, Tableau
- Data Management: ETL, data integration, data quality, data modelling, relational databases
- AI & Analytics: Machine learning, XGBoost, TensorFlow, SHAP, predictive modelling
- Governance & Delivery: GDPR, AI governance, requirements gathering, stakeholder communication, Agile

CERTIFICATIONS & AWARDS

- Data Analyst in Python | DataCamp
- Data Analyst in Power BI | DataCamp
- Government of Ireland International Education Scholarship
